Prairie View A&M University, Prairie View, TX
Bachelor of Science in Computer Science, College of Honors | Minor: Psychology

Expected May 2027
GPA: 3.80

Relevant Courses: Data Structures, Analysis of Algorithms, Intro to Parallel Computing, Database Management, Senior Design I & II, Artificial Intelligence, Computer Networks

Technical Experience

Prairie View A&M University

Prairie View, TX

Incoming Student SOC Lead – Center for Information Technology Excellence (CITE)

August 2025 – Present

- Configure and troubleshoot wireless services across Cisco DNAC, Cisco WLC, and Juniper Mist, validating access points, VLANs, SSIDs, and access controls.
- Support a certificate-based NAC pilot using Juniper Mist, Microsoft Entra ID (Azure AD), 802.1X, and Cisco ISE to authenticate endpoints and guide noncompliant devices through remediation.
- Develop FortiSIEM reports tracking device power status, CPU utilization, and memory performance to improve infrastructure health visibility.

Technology Projects

FLARE – Fusion-based Learning for Radiology and Epidemiology

- Coordinated technical integration across a four-person team developing an AI-powered medical imaging system, connecting machine learning, backend APIs, frontend functionality, testing, and deployment.
- Developed and integrated CT/MRI pipelines using PyTorch, DenseNet, Flask, React, and image-level fusion, contributing to 87.0% CT accuracy and 0.9459 ROC-AUC.
- Configured model environments, REST API integration, NCSA Delta HPC execution, and remote deployment workflows to support reliable end-to-end system demonstrations.

The Data Dig – Blue Team Incident Response Project

April 2026

- Investigated a simulated security incident using Splunk and Wireshark, analyzing 445,909 network flows and identifying 13,835 malicious FTP and SSH brute-force flows.
- Reconstructed an Ubuntu server attack, mapped Patator brute-force activity to MITRE ATT&CK T1110.001, and developed containment and recovery recommendations.

Leadership Experience

CODE (Council of Distinguished Engineers)

President

- Lead a college-wide engineering council focused on student advocacy, professional development, industry engagement, and collaboration across engineering departments.
- Lead development of a student-governed platform centralizing internships, scholarships, research, certifications, events, and other engineering opportunities.

AWS Student Builder Campus Leader

Fall 2026 – Present

- Selected to represent AWS Builder Center on campus and help students understand cloud learning, technical resources, and certification pathways.
- Build AWS knowledge through Skill Builder, hands-on labs, and certification-focused learning.

IBM Z Student Ambassador

Spring 2026 - Present

- Completed IBM Z learning modules and help students understand enterprise computing resources and career opportunities.
- Continue building foundational IBM Z knowledge through guided technical learning and platform training.

Certifications

CompTIA Security+

June 2026

CodePath Intermediate Cybersecurity

April 2026

Skills

Cisco DNAC, Cisco WLC, Juniper Mist, Cisco ISE, Microsoft Entra ID, 802.1X, Network Access Control (NAC), VLANs, Splunk, Wireshark, FortiSIEM, Nmap, Linux

Python, C++, SQL, JavaScript, Flask, React, REST APIs, Git/GitHub

PyTorch, TensorFlow, Scikit-learn, XGBoost, Pandas, NumPy, NCSA Delta HPC, Slurm

AWS Skill Builder, AWS Hands-On Labs, IBM Z, Vercel, Supabase
